**DETAILED ACTION**

1. This application is in condition for allowance except for the following formal matters:

- a. The lengthy specification has not been checked to the extent necessary to determine the presence of all possible minor errors. Applicant's cooperation is requested in correcting any errors of which applicant may become aware in the specification.
- b. On page 13, line 3 "a" before "travel" should be deleted, and "inertial" should be "inertia".
- c. On page 14, next to last line "corrosion" should be "collision".
- d. On page 21, line 3 from the end of the page "vary" should be "very".
- e. Throughout the claims the terms "severe" and "severity" are indefinite because they are not defined in the claims (i.e., when is the collision "severe"; when is this limitation infringed).
- f. Similarly, in claim 3, "a short time" (line 6) and "a long time" (line 13) are indefinite because it is not clear what a short time or a long time is.

Prosecution on the merits is closed in accordance with the practice under *Ex parte Quayle*, 25 USPQ 74, 453 O.G. 213, (Comm'r Pat. 1935).

A shortened statutory period for reply to this action is set to expire **TWO MONTHS** from the mailing date of this letter.

***Allowable Subject Matter***

2. Claim 1 would be allowable if rewritten or amended to overcome the objection(s) set forth in this Office action.
3. Claims 3-4 and 10 would be allowable if rewritten to overcome the objection(s) set forth in this Office action and to include all of the limitations of the base claim and any intervening claims.

***Conclusion***

4. The prior art made of record and not relied upon is considered pertinent to applicant's disclosure. Miyata et al US006892122B2 and US007350808B2, Blank et al US006540255B1 and Stretzler US007225069B2 all teach front sensors and central rear sensors that determine crash severity.
